MARCH 10, 1985 TESTS OF Recvr & VC2

NOTO

FIRST Unofficial SHOW —

" HAD NO D/C VCR — GUY DAVIS — WINTER CES — UNIDEN

TONIC SAT-TEC / JOHN RAMSEY / DC — SPRAY PAINTED YELLOW — JOHN WALKED BY

UNIDEN BOOTH — SPOTTED HIS D/C — LISTENED TO GUY DAVIS TELL CROWD

HOW UNIDEN WAS GOING TO TAKE OVER WORLD — "Gee I didn't Know

Your guys had decided to use my D/C — May I assume the Purchase

ORDER IS IN THE MAIL? "

MARCH 10, 1985

— Ali LAKE — on Scope display - 1st Clandestine MA/Com VC2

"It looks like Serial data — I would love to Hook my Computer

Terminal up to that to see what there is there — Not that I've

had much success demodulating the data Svcs Hidden on Satellite —

But — one of these days — — — only for non Commercial

Private use, of course".

Testing VC2 Recovery time — Turn on & off each Recvr —

Time How Long it took to Recover descrambled Video + Audio

ESR

Tests — Drake 240 —

Jerry — "We found any Recvr will work — But it doesn't work

on a Parabolic Dish — ! "

— Trying to get the Authorization Light to glow —

CV out MA Com Matter —

" 1800 H1 & T1 Recvrs in stock — MA Com buying time, Knowing

a test such as this would take place"

Sigma VR Recvr — US domestic — $200 Range STU10 Mark IIA /

DX Recvr — Model 700

To Modify Sigma VR — Come directly out of Video Amp chip —

Cap Coupled Video out — 2 Volts — ptop — unclamped Video with

Switch — 2 Wire Recvr Modification — Less than 10 minutes —

VC2 was for HBO/Cinemax —

House SubCommittee on Telecommunications
03/06/86
CSPAN Broadcast Hearings

John
Summers — SNR. exec VP NAB — 2% — 400K Homes — Cannot Rcv. Networks
Costs of Translators? — Does not Know —
Somebody at NAB decided 2% of US Homes did not Rcv The 3 nets —
"people in white Areas" —
James Mooney — Pres NCTA —

Cable Networks instigated by Largest MSOs — Trying to Keep TVRO distribution to Cable operators — or Cable MSOs —

— Viewers First — Cooperative to bring scrambled pgm to TVRO Viewers — Thru TVRO dealers — "To make sure a person who owns a TVRO can buy a service at a Reasonable price".

Jeffery Krauss — M/A Com Wash. Rep-agent / Lobbyist —
The Hardware is not the problem; The software sales Mechanism is troublesome"
— There were 21K descramblers available — HBO on
03/06/86 Record saying only 5K people had signed up for svc (There's being The first & only initial svc).
= only MA Com Dist. Had units to start with —

(2nd set of Hearings in April)
"We want to Find a Commercial Solution, not a Legislative Solution"

FCC Approval:

By adopting 32 minus 25 log Theta Curve —

Jerry Pell — "The FCC is attempting to protect us from ourselves —

MOMENTS OF TRUTH!

1) TUES SEPT 30, 1975 9PM EDST — HBO STARTS
See pages 28-29 CAT J Sept 1976
A) N SNR 54 TO 56 dB — Who needs? —
B) SMALLER THAN A MOUSE —
1) 65 TVROS IN LST YEAR
C) PRODUCTION — CALIFORNIA — 4.5? M FOR GLASS DOME 46 TO ~~56~~ 50dB SNR

CAT J SEPT 1976

TURNING POINT ON SMALL TERMINALS —
1) JUNE 1976 — FCC REV. FOR DECLARATORY RULING

CAT J MAY 1976

A) BOB COOPER TESTIFIED MAY 20, 1976 / CONG LIONEL VAN DEERLIN'S HOUSE SUBCOMMITTEE ON COMM.
"AS THE FCC MUDDLES THROUGH THE COMPLEX LEGAL QUESTIONS OF EARTH TERMINAL (SATELLITE), IT HAS BECOME APPARENT THAT THERE WILL ONE DAY EMERGE A NEW INDUSTRY COMPOSED OF PEOPLE OR FIRMS WHO EXIST SOLELY FOR THE PURPOSE OF PROVIDING TVRO SIGNALS, FOR A FEE, TO ANY CUSTOMER THEY CAN FIND"
CAT J — PG 29 — SEPT 1976

HBO DECIDED AT THE BEGINNING IT WOULD PROVIDE A SVC, NOT BE A CATV OPERATOR. IN 1976 IT HAS COMPETITION FROM OPTICAL SYSTEMS (CATV'S) WHO COME TO THE CABLE OPERATOR & LEASE A CHANNEL, DOING ITS OWN MARKETING & BILLING — MIDLAND, TEXAS — C & P MOVIES —

— Tech. Parameters

1976: Rcvr Threshold Point — 12.5 to 12.8 dB

W/ Threshold extension (only in Theory) 9.5 to 10 dB

1975: SA 10M dish maintained surface to +/− ~~0.0125"~~ 0.025"

Basic System

10M (32.8') Dish — 9,000 lbs / 12K shipping

Az/El Hand driven Mount 190° Elevation, 95° Az

7/8" feedline

Dish Mounted Preamp (not yet called LNA)

$10,000 Rcvr

Dish — 24 Panels / each 200 pounds

Hub — weighs 750 pds

125 mph winds / 1/2" Ice Loading

Rcvrs 3.7 − 4.2 & 1112.5 MHz (~~[illegible]~~ 36 MHz) & 70 MHz.

Single 6.8 MHz Audio

19" W — 5 1/4" Rack

SA had 300 WR-411 Rcvrs in various configurations

Worldwide when HBO began — 200 10M size (+) terminals

First installation: Fort Pierce, Fla. David Smith, Field Install Engineer — "We are shooting for an eventual program of one installation per week* by ~~[illegible]~~ Sept 1976".

= See Henry Marron Quote — Page 36 — 12' Dish.

2nd < Burn Fort Smith, Ark (UA), Laredo, Tx (UA)

A) Andrew supplied 1st non-SA to Tulsa Cable (United Video / Formerly VO Cable) Oct 1975. Had Az/El adjustments on Jack screws for Anik I.

WR411 Rcvrs — Supplied w/ 6 xtals (chs)

= Westar was 1st sat used — RCA leased space from WU — Sublet to HBO.

=

With talk of smaller than 9M (32-25 ls T) ABC Filed Petition for FCC Rule making (Nov 1975) seeking all Rcv terminals be 10M ↑ in size — to Protect future orbital slots. Real Reason for Petition — a Rule making could be used to Freeze FCC Processing of additional CATV TVROs for years — ABC feared TVRO would have Big Positive impact on Cable.

Cliff Schauck: — Photo page 36 CATJ Sept 1976

Building oregon CATV — $2000 Budget — own TVRO — 43dB SNR —

See page 33 Sept 1976 CATJ

Rule of thumb about mesh dishes (no-no)

Words:

Sparklies – Cliff Schlock – Casa Ccus 76,

ANIK I / NOV 09 1971 -12 Ch

II / APRIL 20 1972 -12 Ch

Leased 3 Chs TO RCA (AK)

III / MAY 07, 1975

CANADIAN CABLE TV ASSOC — FROM 1973 TRIED TO LEASE SPACE ON SATS TO CARRY US (BOSTON) TV PGMS TO CAN-CABLE.

JUNE 11, 1975 CABLESAT - 1 OR MORE SPNDRS FOR CANADIAN CABLE - TO USE 4.5M dishes —

CCTA: MIN SNR OF 44 dB

DELTA-BENCO-CASCADE donated 6/75 4.5M DISH ON ANIK —

SMOOTHING TROUBLE OFFS using LOWER NF PREAMPS

Pricing:

8/76 70-120° LNA - 1976 - $8,000 TO $10K

150-160° LNA " " - ?

9/75 3.5 dB (___°) GaAsFet - $2000

2.6 dB ___°) GaAsFet - $6000

1.6 dB ___°) PARAMETRIC - $14,000

OCT 1975 [1975 Predictions - dramatic drop in GaAsFet devices & LNAs 1.6 TO 1.9 dB at $250

Maximum Downlink 2W' (7108)

32 minus 25 C/I Theory – Ant. Response Curves

TASO – CTU I tests run by IRT (Cuomo Fioretti)

1) See interference – 18 dB
   Test people 20 ~~dB~~ dB
   Non " " 17 dB

2) Objectionable –
   14 dB (15 test, 12 min test)

– Polarization Separation – RCA – Frequency Re-use –
   25 to 26 dB Polar. Sep.

(Initial CCIR Report suggested 32 dB C/I)

* You will see images floating sources at ~~C/I~~ 54+ dB SNR
  Then at 49 dB SNR.
